Projects

Wii Balance Board Game: https://github.com/RuralAnemone/balanceboard-raylib

- Developed a test program/minigame to control a FIRST Robotics Competition (FRC) Robot using a Wii Balance Board.
- Implemented in C with the wiiuse and raylib libraries.
- Gained hands-on experience with C APIs and hardware interfacing.

MKWii-RPC: https://codeberg.org/RuralAnemone/mkwii-rpc

- Created a Discord **R**ich **P**resence **C**lient for **M**ario **K**art **Wii**, integrating game status updates into Discord.
- Improved proficiency in modular design and maintaining large, interdependent codebases.

Homelab Networking: https://cdn.reginald.world/dns.txt

- *Systems & Infrastructure:* Developing and maintaining a personal homelab utilizing RaspberryPi devices and old desktop "server hardware".
- *Networking (planned):* Planning deployment of a Cisco network switch to improve connectivity and support future expansion.
- *Architecture:* Preparing to replace Cloudflare Tunnels with a fully self-hosted deployment model.
